

PV DC SPD Certificate Scope Sheet

LEEYEE / CNSPD surge protection document summary for buyer pre-review, OEM marking, project filing and model confirmation.

Document type	Certificate scope summary
Product family	PV DC Surge Protective Device (SPD)
Voltage groups	600V / 1000V / 1500V DC SPD
Prepared for	Importers, distributors, PV combiner box suppliers, OEM / private label buyers and project pre-review.
Note	This sheet summarizes available certificate documents. Before tender submission, regulated market approval or OEM marking, confirm the latest certificate copy and exact model scope with LEEYEE.

1. Certificate document matrix

The following matrix shows the PV DC SPD certificate documents currently organized for buyer review. Availability means that the related document has been provided for the corresponding voltage group. It does not replace model-by-model confirmation before formal use.

Voltage group	Typical model documents	TUV	CE	CB	Status
PV 600V DC SPD	LY1-C40PV 2S / 3S 600V	Open PDF	Open PDF	Not listed	TUV + CE available
PV 1000V DC SPD	LY1-C40PV 2S / 3S 1000V	Open PDF	Open PDF	Open PDF	Most complete document group
PV 1500V DC SPD	LY1-C40PV 3S 1500VD4	Open PDF	Open PDF	Not listed	TUV + CE available

2. Datasheet and product document references

The datasheet PDFs below should be used together with the certificate documents when confirming model, voltage, pole configuration, installation layout and ordering details.

Document	Main use	Link
LY1-C40PV 2S 600V DC SPD datasheet	Model data, dimensions and wiring reference	Download
LY1-C40PV 3S 600V DC SPD datasheet	Model data, dimensions and wiring reference	Download
LY1-C40PV 2S 1000V DC SPD datasheet	Model data, dimensions and wiring reference	Download
LY1-C40PV 3S 1000V DC SPD datasheet	Model data, dimensions and wiring reference	Download
LY1-C40PV 3S 1500VD4 DC SPD datasheet	Model data, dimensions and wiring reference	Download
LEEYEE SPD user manual	Installation, operation and maintenance reference	Download

3. Product label and OEM label references

For OEM, private label and distributor review, buyers usually need to confirm the printed product label, voltage markings, wiring symbol, certification marks and packaging label before mass production.

Reference	Main use	Link
Product label photo	For checking model, electrical parameters and front label marking.	View image
Packaging / OEM label example	For label parameter confirmation, OEM packaging review and distributor approval.	View image

4. Important scope notes

- Certificate documents should be matched by exact model name, voltage rating, pole configuration and applicable standard before use.
- The 1000V PV DC SPD document group currently has TUV, CE and CB references. The 600V and 1500V groups currently show TUV and CE references in this summary.
- Do not assume that a certificate for one voltage group automatically covers another voltage group unless the original certificate scope clearly states it.
- For tender submission, regulated market approval, OEM label printing or project filing, request the latest certificate copy and written model-scope confirmation from LEEYEE.

Contact LEEYEE to request the latest signed certificate copies, matching datasheets, OEM labels or project-specific document packages.

Appendix: direct document URLs

These URLs are included for internal document control and buyer-side verification.
